STOCKHOLM AI

Hosted by

STHLM TECH FEST

Welcome to Stockholm's first AI job fair!

We're extremely excited to see this event coming to life and that you're here to share this unique experience with us.

Network with established multinational companies and exciting small enterprises using AI, Machine Learning and Data Science in their day to day operations, product and/or services.

Connect with the region's most exciting community of AI pioneers, entrepreneurs, and professionals, and take a big step towards your dream career.

Welcome!

The Stockholm AI team

What you can expect

AWARENESS

Boost your awareness of career opportunities, along with your knowledge about real life AI applications and use cases. Meet and connect with industry representatives who can offer you information about available roles and career opportunities at their companies, as well as insights from their experience of implementing AI solutions in practice.

ENGAGEMENT

Use this event to establish connections with companies / talents of interest. Build or expand your professional network by finding mutual interests that you wish to explore together. Leverage the opportunity to liaise with potential new employers / employees, and find the ones that are right for you.

OPPORTUNITIES

There will be lots of open positions and career opportunities, as well as talent looking for their next data adventure. Don't hesitate to ask what people are looking for! Whether senior professionals, young professional, students, big international companies or startups, there is something for everyone.

Get the most out of the job fair

Here are a couple of pointers that can help you get the most out of your job fair experience:

Start conversations and make connections

Besides looking for open positions or career opportunities, a job fair is an excellent place to network and establish personal connections for the future. It is often much easier to get an impression of a company if you talk to them in person, so don't hesitate to strike a conversation and find out what you have in common. Don't know the company? Don't know the industry, but you would like to work in it? This is the time to find out more, so go and explore!

Have a short intro ready

Before you walk up to a company make sure you have a short self-intro ready. Besides your background, make sure you know beforehand what you are interested in, what you are looking for, what you would like to know about the company and what you can do for the company.

Be ready to answer questions

In line with the above, be prepared to answer questions about yourself. It's not an interview, but companies will surely want to know more about you and your motivations, so be ready to talk about yourself.

Don't hesitate to pay a company a 2nd visit

Don't hesitate to talk to a company again near or at the end of the fair. Companies will be meeting people all day, so coming by for a 2nd time before the end of the fair is a great way for them to remember you. Reiterate what you like about them or even ask follow up questions and gather data for comparison with other companies. Either way, this is your time to leave an impression.

Ask company representative if you can stay in touch with them directly and follow-up with a message with the people you connected with

This is perhaps the most important thing you can do during or immediately after the job fair, besides directly talking to companies. Ask company representatives if you can stay in touch with them directly and if they share their contact information with you, write to them as soon as possible. Company representatives will be meeting people all day, so reaching out to them early via a personal channel they have shared with you can make you stand out of the crowd. In the message, don't forget to express appreciation for taking time to talk with you and reference something specific from your conversation to make it easier for them to identify you.

Dress to impress, right?

This is always a personal choice, but it's by no means necessary to come in a 3-piece suit or anything similar. Dress like you would normally for work or school and let recruiters see who you are.

Update your CV and/or LinkedIn profile

Make sure you have your CV and/or LinkedIn up to date. In the case of your CV, make sure you have a digital copy that you can email on the spot while at the event, as well as some printed copies to hand to companies directly. As for your LinkedIn, make sure you know the URL to your profile in case you need to email it to someone.

Didn't find what you were looking for?

You might not find an interesting or fitting opportunity at the job fair or recruiters might pass on your profile. That's ok! This is why networking during the job fair is so important. Maybe you didn't find an opportunity for you on the day, but that doesn't mean that there won't be any in the future. If you get to know the companies you're interested in and use the personal connections you made during the job fair to stay in touch with them, you might hear about a future opening that fits you before others on the job market. So don't worry too much about what happens on the day and instead focus on connecting with the people you meet.

Student? Read this

The career fair is an excellent opportunity for you to:

- Understand the needs of the labor market and where opportunities are available
- Learn how to relate your study field to industry needs and applications
- Know the types of skills and experience expected in new graduates
- Find out which companies offer internships
- Find out about each company's recruitment process
- Start or grow your business networks by talking to industry professionals

Some additional useful tips and questions to ask companies at the career fair:

Tip: take a notepad and pen with you, so you can write information down.

- Do you have a graduate recruitment program and what opportunities exist within your company for new graduates?
- What is the application process?
- What professional development opportunities exist within your company?
- Do you have any opportunities for internships within your company in [your field of interest]?

- Are there any opportunities in your company for temporary work during the summer to gain experience?
- What is the main business of your company and the range of roles available?

About to graduate? Start building your professional network:

- You should talk to company representatives about the opportunities that you are interested in, use your CV to point out relevant points of interest and how you match the role.
- Ask for the company representative's contact information and follow up with an email after the event to thank the representative for talking to you and forward a soft copy of your CV.
- Ask about any opportunities to talk to someone from within their company about your chosen field of work so that you can find out more about the job role and the company.

STHLM TECH FEST

Special thanks to STHLM TECH for having helped us make this event a reality.

We reached out to STHLM TECH before the summer to ask if they would be interested in co-hosting Stockholm's first AI job fair at the time of their STHLM TECH Fest. They immediately signed on!

STHLM TECH integrated us into their main program in no time and agreed to provide the venue for the job fair, which is the space we are in today.

Thank you for a great and spontaneous cooperation!

Special Thanks

Stockholm AI was established to act as a platform for exchanging knowledge between experts in different fields relating to AI.

We are dedicated to establishing Stockholm as a global player within Artificial Intelligence (AI) and Machine Learning (ML), as well as being the main hub for the Stockholm AI / ML community.

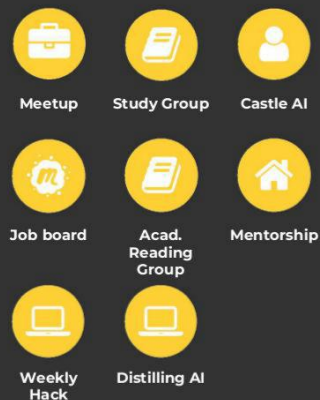

Stockholm AI

We are a community of over 1,600 AI and Machine Learning professionals, Data Scientist and data enthusiasts.

We encourage our members to **take initiative and arrange events**, which has lead to a myriad of recurrent activities...

... many of which we host with the help of our generous industry friends.

Become a member, it's for **free!**
